SANI MUHAMMAD SANI

Software Engineer | AI Solutions Engineer | AI Automation Engineer | AI/ML Engineer
+234 8063055417 | Email | GitHub | Kaggle | LinkedIn | Portfolio

SUMMARY

Software Engineer and AI Solutions Engineer experienced in designing, developing, and deploying scalable software applications, intelligent automation systems, and AI-powered business solutions. Skilled in Python, JavaScript, Node.js, FastAPI, Django, Laravel, React, Next.js, SQL and NoSQL databases, with practical experience integrating Large Language Models (LLMs), machine learning models, and AI APIs into real-world applications. Experienced in developing REST APIs, architecting backend systems, building AI-driven applications, automating business workflows, and deploying reliable cloud-ready solutions using CI/CD practices. Passionate about translating complex business requirements into scalable software architectures and intelligent AI solutions that improve operational efficiency, solve business problems, and deliver measurable value.

TECHNICAL SKILLS

Languages: Python, PHP, JavaScript, SQL, Bash
Backend: FastAPI, Django, Laravel, NodeJS, REST APIs, Celery
Frontend: React, Next.js, Angular, Flutter, React-Native
AI/ML: OpenAI API, TensorFlow, Scikit-learn, OpenCV, Pandas, NumPy
Databases: PostgreSQL, MySQL, MongoDB, Redis
Cloud & DevOps: Docker, GitHub Actions, Jenkins, Linux, Git, CI/CD, Grafana, Prometheus

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER | Century Information Systems Ltd.
Sep 2024 – Present
• Design and develop scalable backend systems using Laravel and Angular.
• Build secure REST APIs supporting enterprise software applications.
• Integrate AI-powered features that automate business processes and improve productivity.
• Design secure database architectures using Laravel, MySQL, and Linux.
• Optimize SQL queries, improving API response times by over 35%.
• Implement monitoring, logging, and performance optimization for production systems.
• Collaborate with cross-functional teams to deliver production-ready software.

DATA ANALYST | Quantum Analytics NG
Jan 2023 – Sep 2024
• Built automated data processing and reporting workflows using Python and SQL.
• Developed dashboards and analytical reports to support business decisions.
• Performed exploratory data analysis and predictive analytics on structured datasets.
• Developed machine learning models for classification and prediction.
• Automated data preparation and feature engineering workflows.

CERTIFICATIONS

Master in Cyber Security — Digital Regenesys | 2024
Data Science with Python — Simplilearn | 2024
Big Data Analytics — Simplilearn | 2024
MongoDB Developer — Simplilearn | 2023
React Developer — Simplilearn | 2023

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science
Umaru Musa Yar'adua University | 2019
